1. You can see giraffes, lions, crocodiles on a _____ in Africa.
2. The lions _____ and share their prey with other lions.
3. Giraffes, elephants and monkeys are _____.
4. Dinosaurs are _____ now.
5. We shouldn't go near lions because they _____ people.

READ THE TEXT AND ANSWER THE QUESTIONS

.....
We live in a clean world. We should protect our environment to keep it clean, but how?

First, we shouldn't harm the environment and make it dirty. We should plant trees and protect seas, lakes and oceans.

Second, there are a lot of animals in the world. Some animals live in water, some live in forests. We shouldn't hunt them. We should keep their habitats clean. When people don't protect the environment, it causes global warming. Then global warming causes animal extinction.

Also, we should save energy. For example, we should turn off the lights when we don't use them.

Don't forget! To protect our environment means to protect our future.

1. **What can be the best title for the text?**
 - A. Endangered animals
 - B. Save the world
 - C. Wasting energy
 - D. Animals' habitats

2. Complete the sentence.

We shouldn't

- A. keep the animals' habitats clean.
- B. hunt animals.
- C. protect wild life.
- D. save energy.

3. What is the text about?

- A. Hunting animals
- B. Global warming
- C. Saving energy
- D. Protecting our environment

4. Which of the following is CORRECT according to the text?

- A. People should protect the environment.
- B. The animals don't hunt other animals.
- C. Global warming is not important for our environment.
- D. We shouldn't plant trees near the seas and oceans.

5. Which question IS NOT answered in the text?

- A. What should we do to protect the environment?
- B. How can we save energy?
- C. Which animals live in the forests?
- D. What causes animal extinction?

ANSWER THE QUESTIONS ACCORDING TO THE INFORMATION GIVEN IN PARENTHESIS

1. When did the dinosaurs become extinct? (65 million years ago)
